EDUCATION

Bennett University
Greater Noida, India
Bachelor of Technology in Computer Science Engineering, Specialization in Artificial Intelligence
Expected Graduation: 2028
Relevant Coursework: Machine Learning, Artificial Intelligence, Data Structures and Algorithms, Database Management Systems, Software Engineering, Probability and Statistics

---

EXPERIENCE

Artificial Intelligence Intern
Enginow
January 2026 – February 2026

- Worked on core AI development tasks using Python, PyTorch, and TensorFlow
- Built and trained machine learning and deep learning models on structured datasets
- Performed data preprocessing, feature engineering, and experimental evaluation
- Improved model performance through hyperparameter tuning and architecture refinement
- Integrated trained models into backend systems for deployment workflows
- Documented experiments and technical progress reports

Software Developer Intern
University Project
January 2025 – May 2025

- Designed and implemented scalable REST APIs using Django for a campus management platform
- Reduced API latency by 30 percent through database query optimization and indexing

- Built structured backend workflows ensuring reliable data synchronization
- Collaborated in a four member engineering team using Git based development practices

---

PROJECTS

SynapseAI Multi Agent Autonomous AI Organization System | Python, PyTorch, FastAPI
Status: In Development | GitHub: github.com/devrot-ai

- Designed a multi agent AI system simulating enterprise workflows across strategy, model training, and deployment
- Built agent orchestration layer enabling task delegation, structured communication, and iterative evaluation
- Implementing contextual memory persistence using embeddings
- Integrating machine learning training pipelines within agent workflows
- Developing backend APIs to execute and monitor agent tasks

Amigo AI Driven Mental Health Platform | React, Django/FastAPI, AI Agents
Live: https://amigo-ruddy.vercel.app/

- Built an AI powered conversational system using multi agent orchestration workflows
- Designed contextual response system prioritizing safety and reliability
- Implemented backend session management and scalable API architecture
- Deployed full stack production system and presented at IIT Guwahati startup expo

BreatheEasy Real Time Data Intelligence Platform | React, Python, APIs
Live: https://breathe-easy-1.vercel.app/

- Developed real time dashboards visualizing air quality datasets across global cities
- Transformed raw environmental data into structured insights
- Designed scalable frontend and backend integration

Collegesiksha Campus Resource Management System | React, Django, PostgreSQL
Live: https://drone4s-xi.vercel.app/dashboard/parking

- Engineered backend services and database workflows for real time resource tracking
- Improved frontend and backend data synchronization and dashboard performance

---

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, HTML, CSS
Frameworks and Libraries: Django, FastAPI, React, PyTorch, TensorFlow, Scikit learn, Pandas, NumPy
Tools and Platforms: MySQL, PostgreSQL, AWS EC2, AWS S3, Git, GitHub

---

HACKATHONS AND ACHIEVEMENTS

- Finalist Quanthon Hackathon IIT Madras
- Top Finalist DRONE4S Hackathon IIT Roorkee
- Finalist Multi Modal AI Hackathon IIT Mandi
- Semi Finalist Composio Hackathon IIT Delhi
- Participant Google Hackspace GDG Cloud Noida and GDG Noida

LEADERSHIP

- Mentor Social Winter of Code
- Mentor Elite Coder Winter of Code
- Core Contributor Bennett University Coding Club
- Member AI Community Delhi
- Member GDG Cloud Noida and GDG New Delhi
